

About me

Self motivated individual that like challenges, people oriented, organize, and scholar person. Not afraid to new technologies, and passionate in developing new projects.

Skills

Front-End: React - Next.js

Back-End: Node.js - GraphQL - Strapi - Axios - Express

Databases: MongoDB - PostgreSQL - SQLite

Experience

Magic 97.3 app

Helped with the engineering of magic, the app for one of the biggest radio stations in Puerto Rico, with more than 10,000 downloads.

Social website

This project lets users create post, and comment on post that belongs to others or of their own. Posts can only be created by users that are register to the website, in the same way post can only be deleted by its own user. It was created with react, and used Apollo for fetching queries created with graphql, and create mutations.

Appointments website for COVID-19 centers

Website for COVID-19 centers, enables users to create appointments any time, any where.

Face Recognition

Website that enables users to detect faces position on images they submit, and ranks them accordingly to their number of submits.
